

Letter of Recommendation

I would like to recommend Sital Nagarkoti for admission to the graduate program at your university. I have known Sital Nagarkoti for about 2 now as an undergraduate student in Computer engineering. I have taught him courses on student.courses. Moreover, I was the supervisor for his final year project. I taught him Data Communication, Computer Architecture and Organization, and Theory Of Computation.

I recall as a sincere and hardworking student. He maintained excellent academic performance throughout his undergraduate ranking among the top percent students of his batch. As an instructor and his supervisor too I had enough opportunity to observe his capabilities closely.

I was the supervisor in his project titled student/project_title . I was quite impressed by his hardworking nature and learning capability. I could observe his keen interest and aptitude for research while working on the project. In fact, at the end of the project, he was also able to publish a paper.

I have noted his best presentation skills while he presented his work at our department as well as in the conference. He is a well-spoken person with a friendly and gentle personality. He is very helpful and cooperative student. He eagerly handed over his project work to his juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also seen his presentation and communication skills during his project and paper presentations.

I am quite confident that skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required. jhjhjh
