

Letter of Recommendation

I would like to recommend Abhay Nepal for admission to the graduate program at your university. I have known Abhay for about 2 years now as an undergraduate student in Electronics Engineering. Moreover, I was the supervisor for his final year project. I taught him Microprocessor, and Advanced Electronics.

I recall Abhay as a sincere and hardworking student. In fact, he was the topper of his batch in Electronics Engineering. As an instructor and his supervisor too I had enough opportunity to observe his capabilities closely.

I was the supervisor in his project titled Drone Working Mechanism. I was quite impressed by his hardworking nature and learning capability. I supervised him in his project AI. I could observe his keen interest and aptitude for research while working on the project. In fact, he was also able to publish a paper on New Technology.

I have noted his excellent presentation skills while he presented his work at our department as well as in the conference. I have seen that he has good leadership capability and has a teamwork spirit. He also has given his time to different social causes. He is very helpful and cooperative student. He eagerly handed over his project work to his juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also been impressed by his communication skills during project presentations and lectures.

I appreciate his technical and professional skills. Besides academics, he was also involved in several extra-curricular activities. He participated in various competitions organized in and off the campus. Unlike, most students who limit their project to an academic exercise, he actually deployed his project publicly in our server and maintained it. He has worked in some IT companies which, I believe, has further added to his technical skills and professional experience.

Valorant pro player bolte.

I am quite confident that Abhay's skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.

Subarna Sakya,

Dr. Professor,

Department of Computer and Electronics Engineering

Pulchowk Campus, Institute of Engineering, Tribhuvan University
