Letter of Recommendation

I would like to recommend Mausam Basnet for admission to the graduate program at your university. I have known Mausam for about 3 now as an undergraduate student in Computer engineering. Moreover, I was the supervisor for his final year project. I taught him Computer Architecture and Organization, and Theory Of Computation.

I recall Mausam as a diligent and competitive student. He maintained excellent academic performance throughout his undergraduate ranking among the Top students of his batch. As an instructor and his supervisor too I had enough opportunity is observe his capabilities closely.

I was the supervisor in his project titled Video Compression with Deep Neural Network . I was quite impressed by his hardworking nature and learning capability. I could observe his keen interest and aptitude for research while working on the project. In fact, at the end of the project, he was also able to publish a paper on Paper KO Name.

I have noted his outstanding presentation skills while he presented his work at our department as well as in the conference. I have seen that he has good leadership capability and has a teamwork spirit. He is a well-spoken person with a friendly and gentle personality. He also has given his time to different social causes. He is very helpful and cooperative student. He eagerly handed over his project work to his juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also been impressed by his communication skills during project presentations and lectures. Shital is chor.

Shital is chor.

I appreciate his technical and professional skills. Besides academics, he was also involved in several extra-curricular activities . He participated in various competitions organized in and off the campus. Unlike, most students who limit their project to an academic exercise, he actually deployed his project publicly in our server and maintained it. He has worked in some IT companies which, I believe, has further added to his technical skills and professional experience.

I am quite confident that Mausam's skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.
